DESIGN SOLUTIONS

SLEEK STORAGE | Elaine Rowzee is the first to admit she couldn't picture a wall of cabinetry in the bedroom, but she's thrilled with the outcome. Not only does it provide much needed closet space, it's beautiful to look at.

THE CORNERSTONE | The ultimate goal in the Rowzees' remodel was simply a larger shower. That they got when Seeley suggested moving the toilet and pushing into the adjoining furnace room. She used clear glass for the door and the partial wall to give the illusion of a taller ceiling.

AFTER

BEFORE

There were closets in the basement that held everything from clothes to cleaning supplies, but they were insufficient and poorly designed. The dining table was misplaced in the basement and too far from the kitchen.

The previously renovated basement bathroom was fine, but the shower (the prefab pop-in variety) was just too small.
